

The **ST 400** is designed for cab trucks with a total minimum ground weight of 15,000 kg. It is suitable for recovering and transporting heavy vehicles, thanks to its special structural design featuring a low yet sturdy subframe.

The dimensions of the galvanised steel loading platform can be altered to suit the type of truck or the customer's requirements.

ST 400

- ① The 2.5t, 3t, 4t and 6t versions come with a rear telescopic **hydraulic fork** for the suspended towing of broken-down lorries.
- ② A **rotating boom** can be fitted behind the cab, complete with an adjustable lifting beam for raising and loading cars.
